Nusa Agro Primacoir

ECO-FRIENDLY COIR

Introduction

Nusa Agro Primacoir established in the year 2008 as a manufacturer and exporter of eco-friendly coir based value added products. Our factory is situated in Ciamis , Indonesia . We present to provide premium quality products to global customers with their specified requirements.

We always keep quality for providing high quality coco fiber and coco peat products to the horticulture industry. Our products are 100% natural and organic. In order to guarantee a premium quality product ensuring delivery targets, a continuous and ample supply of coir fiber & coco peat is required. We offer the bulk Coir Products to meet the ever-increasing demands of our clients.

We have proved our capability to be flexible and adaptive to our customer needs as best as possible and serve them with diligence and consistency.

COCONUT FIBER

The main product of our company is Coco Fiber. We produce the high quality Coco Fiber in the industry. Coco fiber, also known as coir, comes from the inner husk of coconuts. Coconuts are the most widely grown nut in the world and contribute significantly to the economy of many tropical areas. The short, tough fibers can be woven or pressed together for a number of uses. Unlike man-made fibers, coconut is a renewable resource. It's used in products such as floor mats, doormats, brushes, and mattresses. Coir is the fibrous material found

**Detail Specification**

Moisture	: 10 - 16%
Impurity	: 7 - 9%
Length	: 5 - 25cm
Dust Content	: 5 - 10%
Loadability	: 18 - 20mt/40' HC
Bale Weight	: 110 kg (+/- 10%)
Packing	: Tightly strapping band

COCO PEAT

Coco Peat is the binding material that comes from the fiber portion of the husk and is also known as Coir pith or Coir dust is a by-product of extracting coir fiber from the husk of a coconut. The coir dust is washed, heat treated, screened and graded before being processed into various Coco peat products for horticultural/agricultural applications and as industrial absorbent. The compressed coco peat is converted into fluffy coco peat by adding water

**Detail Specification**

Color	: Brown
Size	: 30 x 30 x 15cm
Block Weight	: 5.5 kg
Moisture	: 10 - 18%
pH	: 5.2 - 6.8
EC	: 0.3 - 0.5 ms/cm (washed)
	: 1.0 - 1.5 ms/cm (unwashed)
Loadability	: 18 - 20mt / 40' HC
Drying	: Sun Drying
