GREETING FROM THE CEO

“For more than a decade, League has been the pioneer in Indonesia in the design and production of high quality sports and active-lifestyle products – footwear, apparel and accessories.

We have done so with passion and by working closely with our consumers, design team, manufacturing through to our own factories and working with our local and international R&D partners to produce what we believe to be, one Asia’s leading sports and active-lifestyle brands.

As a reflection of this, our products were selected by the national team to be worn at the Olympics in Athens and London, and we are the sportswear brand of choice of many Indonesian professional teams in a broad range of sports. We test our products and share them with the people who use them on the field, track and court throughout the world. Armed with new findings from our extensive fit studies, we are confident today they’re ready for the rest of the world.

By reinforcing that nothing is more important than high quality at an affordable price, League is constantly attracting new customers – consumers as well as business partners in retail and international distribution to help us achieve our goals.

We will continue to invest heavily in R&D, keeping abreast of the latest fashions, technologies and innovations in the sports and fashion industries, marketing and investing in our brand, working in the community, working closely with our employees to help League become more innovative.

League is a values-based company. Our core values – Courage, Performance, being Authentic, and Inspiration – guide our everyday work and help us accomplish our work in the right way.

We are committed to making the League brand one of the best in the world. This commitment also means that we must match and exceed consumer expectations and to provide them with the highest value.

Finally, the drive for exceptional quality and outstanding value will continue to be a vital focus as we work to truly grow our business, enhance every relationship and improve and empower the lives of our consumers, partners and employees.”

Prajna Murdaya, CEO

INTRODUCTION TO LEAGUE

League entered Indonesia’s footwear industry in 2004 and quickly gained a reputation as a premium brand for its quality footwear, apparel and accessories for men and women, professional athletes through to active-lifestyle enthusiasts.

We have more than 20 years of design, manufacturing and retail experience behind us, including working with some of the world’s most valuable sports brands such as Nike and Puma. The core of our products lies within our stylish yet functional footwear line, which includes a fantastic collection of running, soccer, futsal, basketball, and lifestyle shoes. We also sponsor prestigious national and international sporting and lifestyle events. The highlight was in 2012, when we proudly sponsored the Indonesian national team at the London Olympics.

We are enjoying solid growth of sales via more than 1,000 stores domestically, the brand is beginning to take on major global markets in Asia, the Middle East and the United States. Our dedicated retail and online ventures are also set to begin soon which will support our controlled growth policy.

IN THE PURSUIT OF EXCELLENCE

Our award-winning and environmentally sustainable factories come with latest production technologies and facilities to create high quality footwear, apparel and accessories.

After years of making performance products for the world’s top companies and athletes, we have assembled a team with deep knowledge and expertise, and a passion for superior style, quality, and comfort.

This dedication and experience, on top of the brand’s creativity and reputation with the highest level of performance style, are part of a long tradition in the pursuit of excellence.

PRODUCTION & SOURCING

Our factories are world class in regards to technology, safety and sustainability. Our initial establishment as the exclusive licensee and distributor of international footwear to over 90 countries around the world meant that we are used to meeting these standards.

Overseeing several thousand workers, our factories have set high safety standards with zero accident reports, advanced fire emergency response programs, as well as contractor and maintenance safety programs. Since sustainability is important to us, we have implemented a series of programs such as waste and hazardous waste management, energy conservation, and the 3R: Reduce, Reuse, Recycle programs.

SALES & DISTRIBUTION

We are focused on expansion and plan to triple our own point of sales by adding more traditional and modern distribution channels over the next two years in-country and the region.

Our extensive reach into Indonesia's growing sports market is reflected in strong sales through more than 800 multi-brand stores, over 250 department stores as well as our own branded retail stores.

Over the course of a decade, our reputation as a producer of high quality sports apparel has attracted a diverse consumer base, from the retail market, businesses, all the way to the country's military. Our company is currently enjoying a year-on-year 40% annual sales growth while also dominating the local sports footwear market. To support our international sales growth, we have opened representative offices in Singapore, Dubai and Oregon, USA.

OUR TECHNOLOGY

We are always innovating and looking at ways to improve products with new technologies aimed at delivering the highest level of function and performance. Built on a principle that combines thoughtful design, form and fashion together with high functionality, we give our consumers the performance technology they need with the style they want.

We work closely with local and international professional athletes and sports enthusiasts from concept development through to delivering the final product. Assisted by forward-thinking designers from Oregon, USA, we employ international standard technology and research development in the precise construction of each product. Our heavy investment in R&D allows us to be on the front line of the latest technology and innovation.

The team behind League is managing a brand that showcases quality, style, and innovation in every product. From its concept creation, development and testing, to the crafting of the final product, our shoes are always stylish, relevant, and iconic.

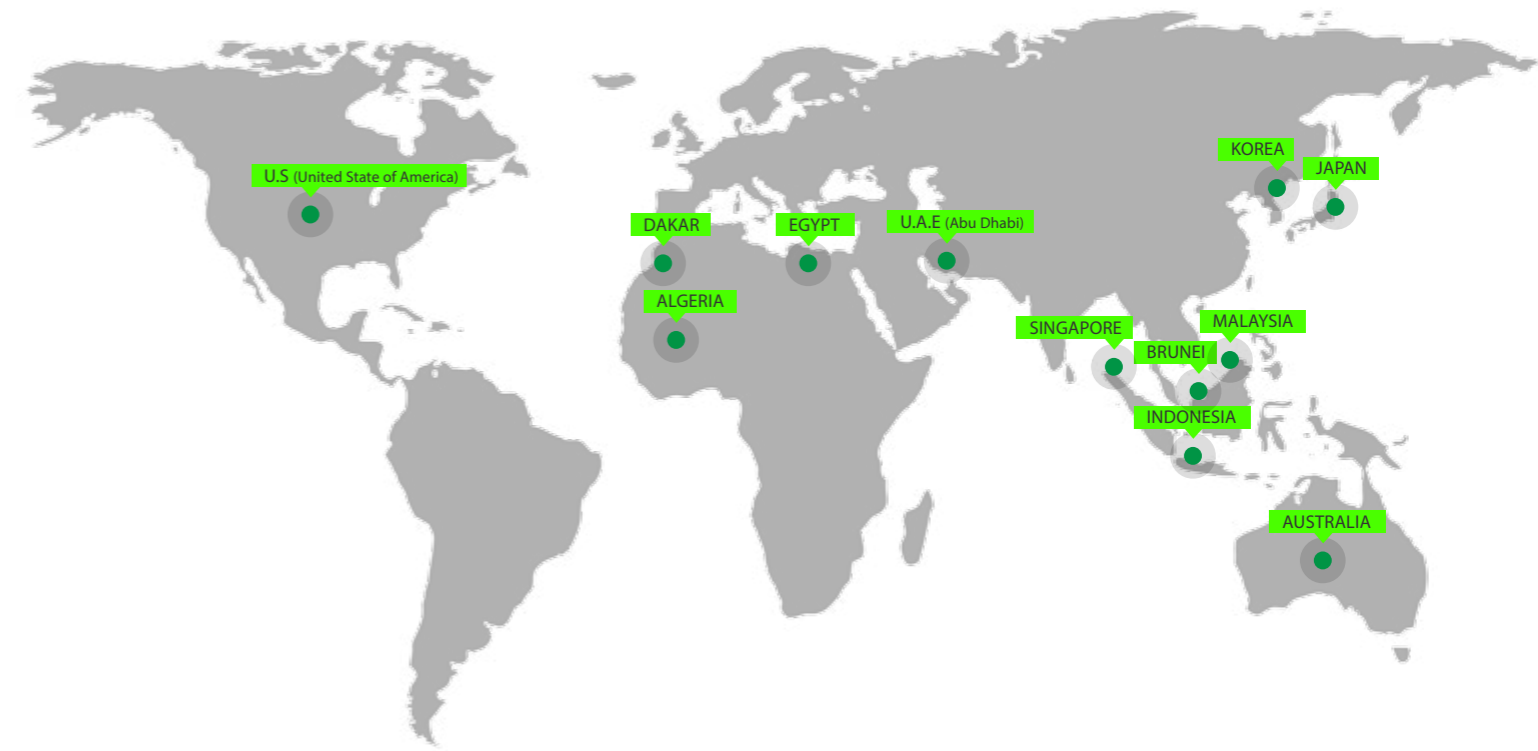

MARKET DEVELOPMENT

Our brand presence and sales in international markets is experiencing double digit growth year on year. After our increased interest and popularity in Japan, Korea, Singapore, Malaysia, Brunei, Saudi Arabia, Dubai and several other African countries, we are planning to expand into the dynamic powerhouse markets like Europe and the United States.

With world-class quality matching our international brand competitors, League is readying itself to be one of the leading up-and-coming sports and lifestyle brands in the world.

Quality and outstanding value will continue to be a vital focus as we work to expand the business, enhance relationships, improve, and empower the lives of our consumers, partners and our people.

World Map

OUR FOOTWEAR & APPAREL TECHNOLOGY

ExoFrame
Combined high temperature TPR welded material and synthetic leather upper which delivers high performance at a lighter weight

Dynamic Control
Direct high frequency welded rubber which provides better control

Dynamic Cushion
Compressed moulded EVA sockliner which provides flexible and stable movement

L-PAC
Inserted low density polyasetate cushioning

HDR
Carbon rubber is inserted into the heel of the outsole to increase durability in a high-wear area

Air Quick Mesh
Form fitting with extra support through a harness construction which enhances heat absorption whilst moving

Reflective
Provides reflecting light in low light conditions

Zip tech
Dual cushioning system which acts like a trampoline to release the energy back after absorbing it

SoftRide
Soft rubber outsole on the fore foot area provides a lighter and softer ride in the mid-foot to fore-foot stride

LITE 45
Extra soft layered foam placed in the insole to provide extra cushioning

QUICK Lace
Fast lacing system easier for and quicker fitting

Combo Pad
Cell-foam based system inserted into the heel to absorb shocks as well as to provide extra comfort and cushioning

Flexolite
Flex zones in the outsole reduce the weight of the shoe and also contours the shoe to the foot during movement

APPAREL

Quick Dry
Ultimate moisture management fabric; moves sweat away from your skin to the surface of the fabric where it evaporates quicker, keeping your body cooler and drier

L-Respira
Breathable system for better air circulation used in specific areas of performance apparel

Reflective
Material / screen printed material which reflects light in low light conditions
