PT. Taman Delta Indonesia is located in **Semarang**, the central part of Java island, 40 minutes flight from Jakarta. Java is almost entirely of volcanic origin, and contains at least thirty-eight mountains of that tapering form which indicates their having at one time or other been active volcanoes. Located in a fertile hilly, flat land Java enjoys very favorable geographic climate conditions for Java Robusta coffee, which is the key reason for Java's reputation of its specific coffee aromatic flavor, **JAVA MOCCA**.

The export division in PT. Taman Delta Indonesia has been developed since 1994. Since the company started it's processing in Indonesia robusta coffee beans and exporting its products to international market.

Basically, PT. Taman Delta Indonesia can supply coffee beans from a number of major Indonesia robusta coffee producing region in Java, Sumatra, Flores and Bali. The suppliers are generally small or medium sized farmers and domestic traders.

The wide product range of our export division as follows:

- WIB Grade 1 - Large/Medium/Small size from PTPN or private estate
- AP-1 Grade 2 - Large/Medium size(Central Java, Sumatra and Flores origin)
- AP-1 Grade 3 - Medium size(Central Java, Sumatra and Flores origin)
- AP-SPEC ELB Grade 2 - Central Java Origin
- EK-SPEC ELB Grade 2 - 350 B.C./425 B.C.
- EK-SPEC ELB Grade 3 - 425 B.C./450 B.C.
- EK-1 Grade 3 - Central Java/Flores origin
- EK-1 Grade 4-60 defects/80 defects
- EK-1 Grade 5 - 120 defects/150 defects
- 20/25 Percent

By fully functioning our machinery, we would able to produce at approximate value of 20,000 MT/year.

In the time forward, the export division will spend its resources on creating better escalation in the sales area. Additionally, PT. Taman Delta Indonesia will maintain to build up secure sources of supply which comply with the requirements of customers.
