NEDCOFFEE

PT Nedcoffee Indonesia Makmur Jaya

Nedcoffee Indonesia is a full subsidiary of Amtrada, who acquired the factory in 2005. Through our sister company Continaf (cacao), we have many years of experience in Indonesia. The factory in Lampung (Sumatra), with a total storage capacity of 300.000 bags and milling capacity of 20 tonnes per hour, allows Nedcoffee to meet any quality or quantity clients require. We only buy the Robusta Asalan from Sumatra sourced from the local farmers. As the raw coffee has high moisture levels at the moment of delivery, it is very important to immediately dry it in order to avoid mould. The unique drying capacity of 25 tonnes per hour assures that all coffee is directly dried and stored under optimum conditions

Today, with the 4th generation of management since the start of the company in 1930, the group is very sound and through a number of affiliated companies very much involved in and committed to the coffee industry. Due to its strong financial basis, knowledge, experience, and commitment, Nedcoffee is a solid partner in coffee.

2004

April 1st 2004, Nedcoffee was established as an independent coffee company within Amtrada Group.

2000

January 2000, the name of the Holding-company was changed to Amtrada Holding.

1990

In 1990, the management and staff established Continaf Holding by acquiring 100% of the Continaf-shares from Berisford Group.

1977

In 1977, the founder of the company, Fopke Fopma, decided to sell Continaf to the U.K-based Berisford Group.

1975

In 1975, 4 years after the death of its founder, the company split up in two. Fopke Fopma, one of the founder's sons, continued its activities in tropical commodities through Continaf, whereas C.C.H.A continued mainly with the export of general merchandise to the African Continent.

1930

Continaf was established in Amsterdam on August 22nd 1930 by Mr. Pieter Arnold Fopma.
