Charcoal Briquettes

Stable Quality
Premium Grade

FLOW PROSES PRODUCTION CHARCOAL BRIQUETTES

1

Sorting Raw Material Coal shell :

We do sorting inspection raw material coal shell every receiving from supplier by incoming quality assurance.

Screen Process :

We do screening proses for separately dust and pure raw material coal shell.

2

3

Blend / Mixture Process :

Continuously with process blend the coal shell and adhesive material before next process extrude (forming process charcoal briquettes).

Drying Process :

Process drying to get solid shape - forming, and to get enough full fill drying to remove the water content after process extrude.

4

5

Oven Process :

Process oven, final drying process with stable temperatur and certain time - hours to get expected level of drought.

SUPERIORITY OUR CHARCOAL BRIQUETTES

Now the discovery of Fuel Energy sources with energy another alternative that can be used as a substitute for Petroleum, Namely: Charcoal Briquette Where charcoal briquettes are very environmentally friendly and can be used daily for cooking, and for other purposes generally used for burning stoves, can also be used to burn "SISHA-HOOKAH", and also used for baking in the Restaurant / Industry needs such as: Barbeque, Steak, or Satay, Etc. Can be used also for heating room and also heating for spas.

We produce charcoal briquettes from indonesia, our product have good quality and no using mixture with another raw material. Because our factory under control with goverment trade ministry and asosiation indonesia farmer.

We produce and sell with two type of charcoal briquettes are coconut shell and hard wood raw material.

We provide depend as request of buyer specification and requirement and your brand name product or company name put into boxes (packaging) that you want.

The superiority of this Charcoal Coconut Briquette, with other types of conventional charcoal fuel sources:

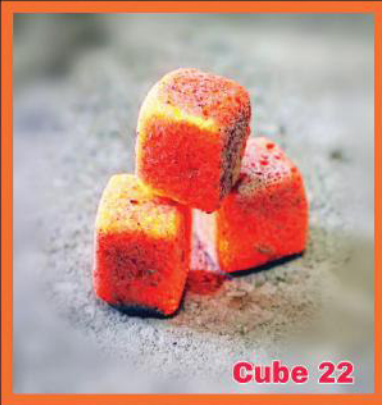

1. Very High and Stable Heat / Calorie Levels (7000 Cal)
2. No a lot of dust / ash
3. No Taste
4. No Prickly
5. No Crack
6. No Impurities
7. Odorless
8. Durable in burning time

STABLE QUALITY

The production of our charcoal briquettes has a quality that is guaranteed to be stable, because in the briquette production process we carry out quality checks several times for each process.

checking the quality from the start incoming receipt of raw materials from supplier, and sampling is carried out per lot production during the mixing/blend process and during the extrud process also.

Besides that we also check the weight per pieces of charcoal briquettes specially weight when the condition of the charcoal briquettes is wet and dry after the oven.

so the weight per kg of charcoal briquettes that have been made-finish goods will be stable.

Benefits for buyers, we are honest and fair to every customer and our buyer to be able to check directly for goods that have been ordered to our factory directly, before the goods are load into container for delivery.
