OPENING MESSAGE

Indonesia is a country in Southeast Asia, which is crossed by the equator and is located between the continents of Asia and Australia and between the Pacific Ocean and the Indian Ocean. Indonesia is the largest archipelago in the world that consists of 13 466 islands is commonly called Nusantara Indonesia is the country with the second highest level of biodiversity in the world after Brazil. These facts indicate the high diversity of natural resources owned by Indonesia

Indonesian waters in the area rich food source for many species of marine plants and animals, and contains too many kinds of mineral resources. The high level of biodiversity of Indonesia indicated by the 10% of flowering plants are known in the world can be found in Indonesia, 12% of mammals, 16% of reptiles, 17% of birds, 18% of coral species and 25% of marine animals , In the field of agriculture, Indonesia is also known for the wealth of its plantation crops, such as cocoa, rubber, palm oil, cloves, and even wood that many of them ranks top in terms of production in the world.

Indonesia is among the spice-producing countries in the world. Because the spices were also the one in Indonesia ever invaded another country. What exactly is meant to spice it?

Spices are aromatic plant parts or strong taste that is used in small quantities in food as a preservative or a flavor enhancer in cooking. Spices are usually distinguished by other plants used for similar purposes, such as medicinal plants, aromatic vegetables, and dried fruit.

By utilizing the natural resources that are so abundant in Indonesia with a solid professional, so PT. Swarna Agro Nusa can manage the resources so abundant and can be trusted either by the buyer, the government and farmers is a chain of industries that can not be separated

COMPANY OVER VIEW

PT. SWARNA AGRO NUSA focus on the main business in the field of agriculture, where more are focus to B2B as a supplier to manufacture by sending an intermediate product, through the process of supervision and management are good products that are produced to make the products are of good quality and can meet the demands of manufacture as end user

Originated from company CV. Daya Alam Indojaya which was formed in year of 2011, as a reason of potential exploration of resources a new company formed in 2014 under PT. SWARNA AGRO NUSA Operating from many areas in Indonesia such as Sumatra, Kalimantan, Sulawesi for take the source.

PT. SWARNA AGRO NUSA cooperation with farmer and government to obtain sustainable source and managed profesionally.

Our vision of **“Became a Great Company in Agro Industry to manage natural resources Indonesia in order to give life to the many people who are associated with this company”**

Our Mission is **“to deliver product at the right quality and standard, at the right specification and at the right price”**. The mission is somewhat forming a competition and effective attitude to all of company member.

SHORT HISTORY OF COMPANY

2011, we established the company, starting from a small business enterprise with legal entity **CV. DAYA ALAM INDOJAYA**, which covered the area of empowerment of Indonesian natural resources, particularly in the product of palm oil. The company began to struggle and looked for the international market. Our first delivery is to Pakistan.

Buyer Visit to CV. Daya Alam Indojaya, 2011

Form Left to Right : Mr. Andy, Mr. Andrew (Australia), Mr. Freddy, Mr. Edy

From that first international shipment our company began to be known as palm oil exporter and continue to grow. In mid-2014, one of the founders (mr. Eddy) suffer of strong illness and and sold the shares . From that transaction the company name was changed to Co., Ltd. legal term and changed the name into

PT. SWARNA AGRO NUSA

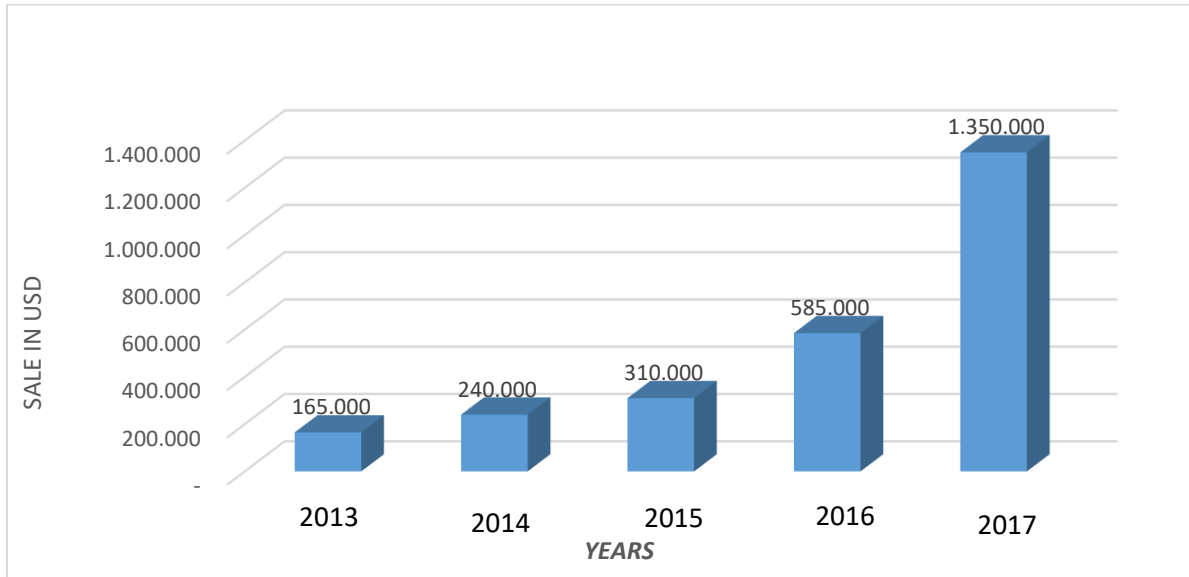

With the new name, **PT. SWARNA AGRO NUSA** has increase very significant growth. The company's turnover has increased sharply, and since then we started to expand into processed coffee bean and tea leaf. The company still do the palm oil business but started to do expansion to coffee and tea and began building network to coffee and tea farmer groups directly under the direction of **PT. SWARNA AGRO NUSA**.

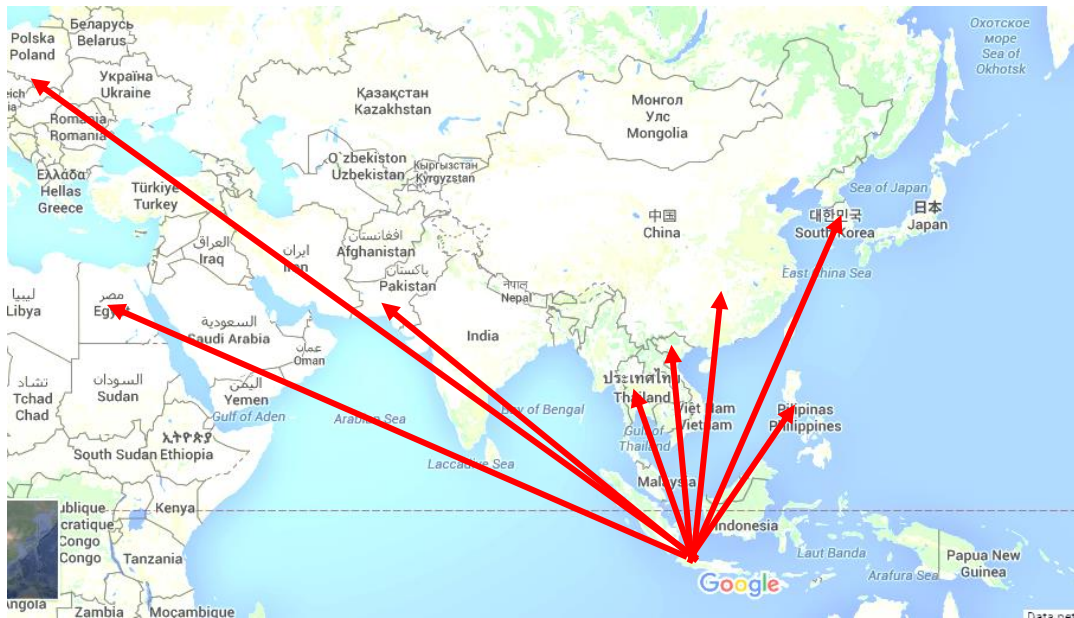

1. Mr Hassan – Eqtyt
2. Mr Laurent – Taiwan
3. Mr Cheon – Korea
4. Mr Damian - Poland

This network building and supervision to ensure the quality of the goods and the company win the confidence of the various buyers. It is strongly associated with the experience of Mr. budiman which has a dozen years managing and developing the company. Below the achievement present in graph :

Our turnover increased also in because we started to sell to countries - other countries such as korea, vietnam, thailand and china, even our sales to Korea reached more than 50 containers in 2015. dan year our sales turnover reaches over 1 million dollars in the year , Our sales are not only dominated by products from oil palm, but some also have started selling coffee and tea just that we sell through traders

CEO MESSAGE

it doesn't feel like it's been 5 years since PT Swarna Agro Nusa was founded in 2014

First time we will say very grateful to all customer, staff and supplier without you we can't reach this level

And then we feel very cornered, when PT Swarna Agro Nusa increasingly believed our customers to continue supply and make business growth together

In the this years, hopefully PT Swarna Agro Nusa will served better and served to many company in the world, to make the leader of agriculture industry from indonesia, and we will brings indonesia agriculture product to have famous in the world and make indonesia agriculture product liked many people in the world, and flies with PT Swarna Agro Nusa to become the biggest company in agriculture and become a shelter for many people who are connected in PT Swarna Agro Nusa.

For achieve these noble goals, I'm invite all PT Swarna Agro Nusa Staff to always be OPTIMISTIC and work with your heart to serve more customer. i believe I can, and Together we can reach all our dream

Keep in fire and

Go to Billionaires company !!!

The value of companies in cherished by every personnel is **REMEMBER** in the Java language called Eling, so that the personnel will continue to be able to do your best, work with all our heart and ask God's help in all that was done

PRODUCT OVERVIEW BASE ON CATEGORY

TEA LEAF

Indonesia is currently the 7th largest tea producer in the world. Nevertheless, because of the prospect of lucrative business of palm oil, tea production has declined in recent years because some of the tea plantation has been converted into oil palm plantations, while the tea plantations that others have halted production to produce vegetables or other agricultural products that more profitable.

Although there is a decrease in land area, the amount of tea production has remained relatively stable. This indicates that the tea plantations are left become more productive

Our product concern on green tea and black tea with many kind of process

same as a coffee, to guarantee for quality and continously supply, we take a plantation and process and manage under management PT. SWARNA AGRO NUSA

100 ha plantation with level 1400 above sea level, in west java with process till ready to export

ESSENTIAL OILS

This is a new department from PT Swarna Agro Nusa in last year, This department will make because we will found many rejected material from our spices, after we discuss with our team we decided to make essential oils and make a new market about essential oils, our observer indonesia essential oils have many material for make it, and have a big market in the world. Since last year PT Swarna Agro Nusa starting to produce essential oils with take over company distillating and found market in indonesia and world wide. In the future we will research and make many essential oils

Sure you need to connected internet to play this video

Citronella oil is an essential oil obtained from the leaves and stems of different species of *Cymbopogon* (lemongrass). The oil is used extensively as a source of perfumery chemicals such as citronellal, citronellol, and geraniol.

clove oil, is an essential oil extracted from the clove plant, *Syzygium aromaticum*. It has the CAS number 8000-34-8.

Clove is often found in the aromatherapy section of health food stores, and is used in the flavoring of some medicines. Madagascar and Indonesia are the main producers of clove oil.^[1]

Clove oil has been promoted as having a wide range of health effects, but there is insufficient medical evidence to support general claims for its use as a therapeutic

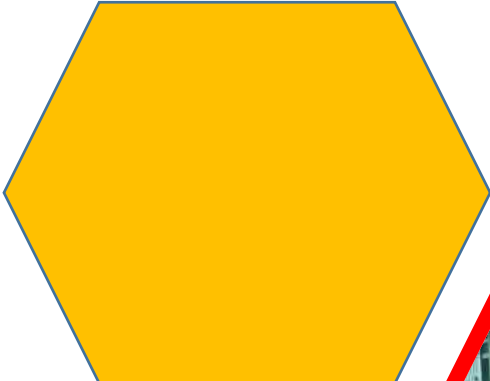

Nutmeg oil is a volatile essential oil from nutmeg (*Myristica fragrans*). The oil is colorless or light yellow and smells and tastes of nutmeg. It contains numerous components of interest to the oleochemical industry. The essential oil consists of approximately 90% terpene hydrocarbons. Prominent components are sabinene, α -pinene, β -pinene and limonene. A major oxygen-containing component is terpinen-4-ol. The oil also contain small amounts of various phenolic compounds and aromatic ethers, e.g. myristicin, elemicin, safrole and methyl eugenol. The phenolic fraction is considered main contributor to

the characteristic nutmeg odor.^[1] Myristicin and elemicin are suspected to be responsible for the hallucinogenic properties of nutmeg oil.

Extraction of patchouli's essential oil is by steam distillation of the dried leaves, requiring rupture of its cell walls by steam scalding, light fermentation, or drying. The main chemical component of patchouli oil is patchoulol, a sesquiterpene alcohol.

Leaves may be harvested several times a year and, when dried, may be exported for distillation. Some sources claim a highest quality oil is usually produced from fresh leaves distilled close to where they are harvested, others that boiling the dried leaves and fermenting them for a period of time is best.
