Ginger

There are three known types of ginger in Indonesia which are giant ginger or White Ginger (*Zingiber officinale* var. *Roscoe*) as regular Ginger, Small White Ginger or Ginger Emprit (*Zingiber officinale* var. *Amarum*), and Red Ginger (*Zingiber officinale* var. *Rubrum*).

The main components of Ginger are carbohydrates, lipids, essential oils, terpenes, and phenol compounds such as gingerol, and shogaol. The Essential oil in Red Ginger is more than White Ginger, while the content of shogaol in Ginger Powder is more than fresh ginger.

Besides for cooking spices, Ginger (*Zingiber officinale*) has many benefits that are good for the body. It has been used for thousands of years for the treatment of hundreds of ailments from colds, nausea, arthritis, migraines, hypertension, diabetes mellitus, bacterial infection, and cancer. The evidence for the effectiveness of ginger as an antioxidant, anti-inflammatory agent (as decrease swelling and pain), antimicrobial, antinausea, and anticancer agent.

Tumeric

Turmeric has many benefits including cooking spices, coloring agents, and curcumin sources. Curcumin has good anti-oxidant effect to fight free radicals in the body, especially liver, curcumin becomes an important substance in the treatment of liver disease. In addition, curcumin inhibits the progression of Alzheimer's disease which impairs cognitive function in the brain.

Temulawak

Curcuma xanthorrhiza also known as Temulawak / Java Turmeric because it originates from Indonesia. It is a ginger-like plant of the family Zingiberaceae, therefore many benefits similar to ginger and turmeric. Xanthorrhizol content found in temulawak has been widely studied as having potential benefits as an anti-cancer agent.
