# Why Corn Husk Flower?

In Indonesia, many farmers grow corn plants. Corn seeds are widely used as a source of food. While the leaves of the stem are used for animal feed. Meanwhile, corn husks are not really used by the community.

Corn husks can be reused, this way the waste from corn husks does not pollute the environment. Corn husks, which were usually thrown away and not used at all, can now be used to make various decorations. One of the well-known decorations made from corn husks is the flower.

Especially Corn Husk Flower has its own beauty and uniqueness. With the game of color arrangement and relatively cheap raw materials, the decoration of corn husks will gain a special place in the hearts of the people.
